 b. Forecast of any pollution or salvage activity across the UK EEZ – Nil
 c. Stockpile and Resource availability: BAU
 d. ETV Activity:

9. Incidents of National Interest: Migrants

10. AOB (network interest): ICT have identified Chrome Browser functionality that should not be available under InfoSec 9.1 Access Control & Password Procedure meaning that users are not permitted to sign in and sync passwords using Chrome Browser. Users can still save passwords locally in Chrome Browser on individual PCs. We have disabled the ability of users to log into Chrome Browser therefore preventing the sync of passwords

Guidance from Tactical Commander – where there are teams of 2 or 3 please consider getting through breaks to ensure maximum numbers in ops rooms when we face maximum demand. If you are getting at all overwhelmed alert me by whatever means available that you need support, it is better to go big early and retract, than try to bring support in late.
