 [SAR Termination Training Delivery Checklist.xlsx](#)

Afternoon All

Hopefully you are all aware of the SAR Termination Protocol training we have been delivering over teams these last few weeks. Due to shift working, sadly we have not managed to cover all SMCs. Julie has asked I share the presentation in order that you can get the remaining officers trained ASAP. We are informed by BF that these tactics can go live anytime now. Hence the urgency from our senior management to complete the training.

I have created a spreadsheet to keep tabs on who has been trained, link above for you to update which SMC's have been trained if you can please amend/update where necessary.

I have also added the link for the SAR Termination Protocol on CIP [Protocol for HMCG Termination of SAR \(sharepoint.com\)](#)

The direction was that we train all SMC's at Humber, Dover & the JRCC (as this is where most zone flexing comes from), followed by training for Tact Cmdr above at all other locations. If it helps, we will be delivering the training to all SMC's at Dover and will aim to include as many other officers as possible so they are aware of the procedure.

If you have not yet received the training George Papadopoulos will be delivering more training this week and will be sending out invites, so might be worth dropping him an email.

Thank you
